PREVENTION IS THE BEST FORM OF DEFENSE

As the leader in Anti Data Exfiltration (ADX), we go beyond managing threats. Rather than focusing on perimeter defense, our preventative approach focuses on blocking the exfiltration of data from your devices. BlackFog Virtual CISO prevents threats from disrupting your business operations and dramatically reduces their risk of a data breach.

TRUSTED SECURITY TEAM

Make cybersecurity a priority in your organization and build your team with a BlackFog vCISO. Worried about cyberthreats such as ransomware, extortion and data exfiltration? Your virtual CISO is in the trenches every day, worrying about the threats so you don't have to.

BlackFog's dedicated team of experts can provide a detailed monthly assessment for your organization. No need to have your own dedicated teams, BlackFog provides everything you need out of the box to protect you from ransomware and other cyberthreats with constant monitoring.

CAN YOU AFFORD A DATA BREACH?

Complex regulatory environments around the globe has led to considerable new legislation, government watchdogs, and compliance departments. The massive fines now being levied has put every organization on notice that they must be prepared.

With the average cost of a data privacy breach at an all-time high of US \$4.24 million, prevention has never been more important.

CYBER RISK

Determine the cyber risk across your entire organization, every platform, every device, in less than a week after deployment.

RANSOMWARE PREVENTION

Protect your intellectual property and the risks associated with ransomware, industrial espionage and prevent malicious activity from inside your organization.

KEY BENEFITS

BlackFog vCISO service provides the expertise you need without the hassle and expense of recruiting your own fulltime CISO.

WHAT THE PARTNERSHIP PROVIDES

- ◇ Access to our threat intelligence experts when you need them*
- ◇ Protection from cyberattacks including ransomware thanks to our Anti Data Exfiltration (ADX) technology
- ◇ A custom branded Enterprise console managed by our team of experts
- ◇ Detailed custom reporting for compliance and auditing

* Pricing includes access to BlackFog's experienced vCISO's and law enforcement professionals with the ability to purchase additional time for emergency response in 15 min increments.

THE TEAM

- ◇ Law enforcement professionals with more than 20 years experience fighting cybercrime
- ◇ Established insider threat experts and risk management professionals with a deep history in law enforcement and cybersecurity investigations
- ◇ Active members of national cybersecurity councils and close liaison with FBI and law enforcement
- ◇ Expertise in regulatory compliance and security policy design and assessments

ABOUT BLACKFOG

Founded in 2015, BlackFog is a global cybersecurity company that has pioneered on-device Anti Data Exfiltration (ADX) technology to protect companies from global security threats such as ransomware, spyware, malware, phishing, unauthorized data collection and profiling. BlackFog uses behavioral analysis to preemptively prevent hackers from exploiting vulnerabilities in enterprise security systems and data structures.

BlackFog's preventative approach to security recognizes the limitations of existing perimeter defense techniques and neutralizes attacks before they happen at multiple points in their lifecycle. Trusted by corporations all over the world, BlackFog is redefining modern cyber security practices.

ANTI DATA EXFILTRATION

Prevent cyberattacks across all endpoints and monitor data exfiltration from any network to ensure compliance with global privacy and data protection regulations.

EXPERIENCE

Our Threat Intelligence team has a deep history in law enforcement and cybersecurity investigations to keep you ahead of the curve.
