# BLACKFOG®

Data Exfiltration Assessment

Discover **BlackFog's preventative approach to data security**. **Install on up to 25 devices**, and get a comprehensive data exfiltration assessment and prevention strategy in just 14 days.

Welcome to your 14 Day Data Exfiltration Assessment

As the industry leader in data exfiltration prevention BlackFog is revolutionizing cybersecurity with its trailblazing ADX technology, offering robust real-time protection against data exfiltration and cyberthreats. This assessment will allow you to install the BlackFog Agent on up to 25 devices to see first-hand the power of ADX. At the end of the 14 day period you'll be presented with your customized data exfiltration report, detailing the threats we identified in your network.
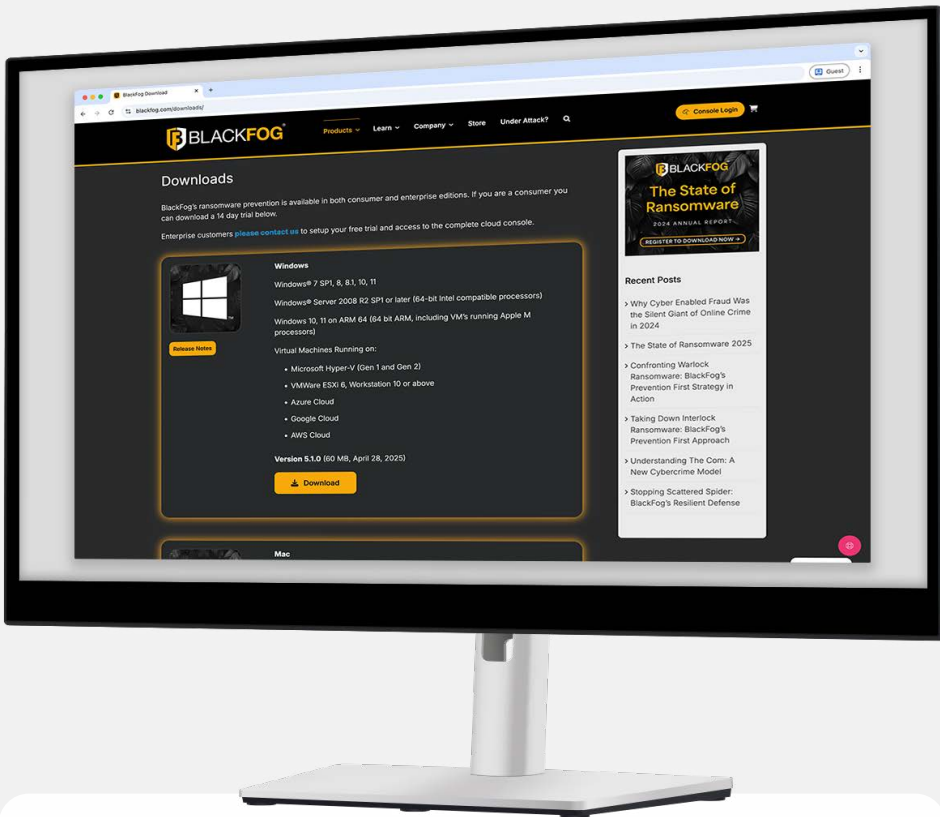

Anti Data Exfiltration

Prevent cyberattacks across all endpoints and monitor data exfiltration from any network to ensure compliance with global privacy and data protection regulations.

STEP 1 License Key

You should have been contacted by a BlackFog representative who will have requested an email account we can use for generating a license key for the assessment. This license will be used to activate each agent and will also include a login to the BlackFog console.

STEP 2 Activation

Download the agent onto the devices you would like to assess.

You can download agents here:

blackfog.com/downloads

Run the installer and start the application. You will then apply the license key we sent into each application. After this is applied the agent will automatically register with the BlackFog console.

- **On Windows & MacOS select Help > License**
- **On Mobile platforms use the licensed email + the PIN code**

Ransomware Prevention

Protect your intellectual property and the risks associated with ransomware, industrial espionage and prevent malicious activity from inside your organization.

Privacy Protection

Prevent data loss and data breaches with our on device data privacy technology. Prevent unauthorized collection and transmission of data from every device on and off your network.

AI Threat Prevention

Fight back against the latest generation of AI based attacks. Our zero trust, zero day AI algorithms are trained to pick up threats that haven't even been invented yet.
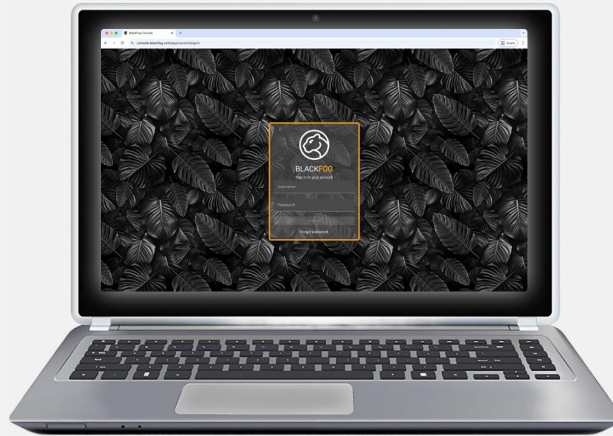

STEP 3 Enterprise Console

In the email we sent you with the license key you will see the login information to the BlackFog console.

You can login to the console here:

console.blackfog.com

Using the credentials we sent, **you will be able to access all the information about the devices registered** as well as the events. A BlackFog representative will guide you through the features it provides.

STEP 4 Assessment Report

At the end of the 14 days we will contact you and send you our assessment and walk you through what we found. This will consist of 2 PDF reports, including a breach analysis and a detailed impact assessment.

STEP 5 On-Boarding

After completion of the assessment you have the option of becoming a customer and completing an onboarding process by BlackFog and/or your Service Provider. This process includes, but is not limited to:

- General BlackFog console training
- Customization to your environment
- Data interpretation and analysis
- Threat Hunting and Breach Reporting
- Agent deployment and configuration

SOC 2 Certified

BlackFog meets regulatory needs and is SOC 2 certified, ensuring best practices and data protection.

About BlackFog

BlackFog is a global cybersecurity company pioneering on-device anti data exfiltration (ADX) technology. Its AI platform preemptively stops hackers from exploiting vulnerabilities in enterprise security systems, preventing ransomware, spyware, malware, phishing, and unauthorized data collection and profiling. It effectively mitigates the risks associated with data breaches and insider threats.
