

FROM RISK TO RESILIENCE:

10 Reasons BlackFog's Virtual CISO (vCISO) is a Game Changer**1 Elite Cyber Expertise Backed by Award-Winning ADX Technology**

ADX Instinct, BlackFog's virtual CISO offering, brings deep expertise in cyberthreat prevention. Paired with BlackFog's industry-leading anti data exfiltration (ADX) technology, it provides your organization with real-time, 24/7 protection against emerging threats.

2 Proactive Threat Intelligence That Stays Ahead

Armed with real-time ransomware intelligence and AI-powered defense, BlackFog vCISOs anticipate and neutralize threats before they can escalate - keeping your security posture one step ahead.

3 Executive-Level Leadership, Without the Executive Price Tag

Hiring a full-time CISO is costly. BlackFog vCISOs provide senior-level security strategy and oversight at a fraction of the cost - ideal for SMBs or organizations optimizing budget without compromising on expertise.

4 Rapid Deployment and Immediate Results

BlackFog vCISOs integrate seamlessly into your existing environment, delivering expert insights from day one. With **ADX Instinct** there is no lengthy ramp-up, just immediate value.

5 Security Strategy Aligned with Your Business Goals

Your BlackFog vCISO collaborates with leadership and IT to design a tailored security roadmap - aligned with your specific risks, compliance obligations, and strategic priorities.

6 Compliance Guidance Across All Major Frameworks

From GDPR, HIPAA, and CCPA to NIST and ISO, BlackFog vCISOs help you navigate regulatory complexity and implement the controls required to stay compliant and audit-ready.

7 Real-Time Visibility Through the BlackFog Console

With ADX Instinct you gain direct access to the BlackFog Console, a centralized platform that delivers real-time visibility and control. From ransomware and insider threats to data loss and unauthorized exfiltration, the console provides a single pane of glass to monitor and manage your organization's security posture.

8 24/7 Monitoring, Incident Response, and Forensics

ADX Instinct is more than a strategy, your vCISO actively supports incident response, breach containment, and forensic analysis - coordinating with internal teams or MSSPs for fast and effective resolution.

9 Board-Ready Communication and Risk Reporting

When it comes to translating technical threats into business language **ADX Instinct** has you covered. BlackFog vCISOs equip executives and boards with clear, actionable insights to guide cybersecurity decisions.

10 Security That Scales With Your Business

Whether you're scaling a startup or managing global expansion, **ADX Instinct** evolves with you - offering flexible future ready leadership at every stage of growth.
