

DATASHEET

ADX Instinct

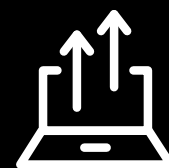

Your Shadow Security Team At Your Fingertips

ADX Instinct, our Virtual CISO service, delivers expert cybersecurity guidance powered by **anti data exfiltration (ADX) technology**. With proactive threat management and data breach prevention at its core, **ADX Instinct** ensures your business stays secure and resilient.

Prevention Is The Best Form Of Defense

As the leader in anti data exfiltration (ADX), we go beyond traditional threat management. Instead of relying on perimeter defense, **ADX Instinct** prevents data from leaving your devices, blocking exfiltration in real-time. By proactively identifying and neutralizing threats before they can compromise sensitive information, **ADX Instinct** keeps your data secure, your operations uninterrupted, and your risk of a breach dramatically reduced.

Anti Data Exfiltration

Prevent cyberattacks across all endpoints and monitor data exfiltration from any network to ensure compliance with global privacy and data protection regulations.

Trusted Security Team

Make cybersecurity a priority with **ADX Instinct**, BlackFog's virtual CISO service. Designed to protect against today's most pressing threats, from ransomware and extortion to data exfiltration, **ADX Instinct** gives you expert security leadership without the overhead of building a dedicated in-house team. Our team of specialists provides continuous monitoring and detailed monthly reports, ensuring proactive protection and compliance. With **ADX Instinct**, you get enterprise-grade security guidance and prevention out of the box, so you can focus on your business while we safeguard it from evolving cyber risks.

AI Threat Prevention

Fight back against the latest generation of AI based attacks. Our zero trust, zero-day AI algorithms are trained to pick up threats that haven't even been invented yet.

Our **threat intelligence team** brings decades of experience in law enforcement and cybersecurity investigations, giving you actionable insights to **stay ahead of emerging threats**.

Can You Afford A Data Breach?

Complex regulatory environments worldwide have introduced stricter legislation, increased oversight, and expanded compliance demands. With massive fines now being imposed, every organization is on notice: preparation is no longer optional.

With the average cost of a **data privacy breach** now exceeding **\$4.44 million**, prevention has never been more critical.

SOC 2 Certified

BlackFog understands the demands of today's complex regulatory environment. We've invested heavily in compliance and are certified as a SOC 2 platform. This certification provides assurance that BlackFog not only follows industry best practices, but also has the processes in place to safeguard your data.

What The Partnership Provides

- Access to our threat intelligence experts when you need them
- Protection from cyberattacks including ransomware with our anti data exfiltration (ADX) technology
- The BlackFog Console: custom branded for your organization, and managed by our team of experts
- Detailed, tailored reporting for compliance and auditing

Key Benefit: BlackFog's ADX Instinct service delivers CISO-level expertise without the cost and complexity of hiring a full-time executive.

The Team

- Law enforcement professionals with more than 20 years experience fighting cybercrime
- Established insider threat experts and risk management professionals with a deep history in law enforcement and cybersecurity investigations
- Active members of national cybersecurity councils and close liaison with FBI and law enforcement
- Expertise in regulatory compliance and security policy design and assessments

Ransomware Prevention

Protect your intellectual property from ransomware, industrial espionage, and insider threats, while preventing malicious activity within your organization.

About BlackFog

BlackFog is a global cybersecurity company pioneering on-device anti data exfiltration (ADX) technology. Its AI platform preemptively stops hackers from exploiting vulnerabilities in enterprise security systems, preventing ransomware, spyware, malware, phishing, and unauthorized data collection and profiling. It effectively mitigates the risks associated with data breaches and insider threats.
